

SE Tylose GmbH & Co. KG
Industriepark Kalle-Albert
Kasteler Str. 45, D-65203 Wiesbaden

These indications correspond to the situation as of 1st February 2023.

CORONAVIRUS / COVID-19 INFORMATION (15)

Dear Customer,

experts in politics and health care affirm that COVID-19 is no longer a pandemic but has now reached endemic status.

The German regulations on protection against COVID-19 infection risks ('Corona Schutzverordnung') are repealed on 2nd February 2023, leading to the following changes for our company, as well as for the Industrial Park Wiesbaden:

The questionnaires for visitors, for suppliers and truck drivers at the gate will no longer be required from 2nd February 2023.

Hitherto protective measures (wearing masks, disinfection, etc.) now become recommendations for health protection.

We can assure you that our company continues to monitor the development of COVID-19 as an endemic in order to minimise the consequences for SE Tylose, its employees and customers.

We are pleased that, together with our service providers for logistics, warehousing and IT, we have been able to act as a stable supplier for our customers during the pandemic. For the future, it remains our obligation to continuously supply our customers to a high service level.

Please do not hesitate to contact us if you have any questions or concerns.

Kind regards,

SE Tylose GmbH & Co. KG Management

(Dr. Diethart Reichel)
