

4th Technical Seminar on Solubility Enhancement From Screening to Downstreaming

11th-12th May 2023

SAVE THE DATE

We cordially invite you to join our 4th Technical Seminar on Solubility Enhancement. Amorphous Solid Dispersions (ASD) is a hot topic for the pharmaceutical R&D teams all over the world.

As experts in the field of ASD, Shin-Etsu together with partners: Alexanderwerk, Frewitt, PROCEPT, Thermo Fisher Scientific, will share latest insights of the ASD development steps ranging from screening phase up to downstream processing.

4th Technical Seminar on Solubility Enhancement From Screening to Downstreaming

11th-12th May 2023

SAVE THE DATE

Topics

- Considerations for screening and technology selection for ASD developments
- Key parameters and particle design for Hot Melt Extrusion and Spray Drying
- Downstream processing (milling, roller compaction and 3D printing)

Lectures

Experts from academia and pharmaceutical companies

Demonstrations

- Spray Drying
- Hot Melt Extrusion
- Milling of Extrudates
- Roller Compaction of Spray Dried Powders
- 3D Printing

Target group

Research and development teams from the pharma industry looking for deeper information on ASD technologies

Location

Courtyard Marriot Wiesbaden, SE Tylose GmbH Wiesbaden

Registration

- Early bird 600 € VAT exempt till end of January 2023, 750 € VAT exempt from February 2023
- Including meeting package, excluding accomodation
- Number of participants limited to 50
